

## Efficiency Toolkit

### Programmable Thermostats

HVAC efficiency represents one of the greatest opportunities for clubs to save money on their operating costs. Managing the HVAC for a facility that has several thermostats and multiple room uses can be done efficiently through the use of an app-based program. Web-controlled wireless thermostats are a grant-funded option selected by many seeking to reduce their operating costs. The supporting app can be used easily from a desktop computer or smartphone, giving your facility manager the power to control both pre-scheduled and on-demand HVAC controls at the touch of a button.

---

Through partnerships with national nonprofits including the Salvation Army, Boys & Girls Clubs of America, and Feeding America, the Nonprofit Energy and Water Efficiency (NEWE) Initiative delivers cost savings through energy and water reduction resulting in additional funds that can be reallocated toward each nonprofit's mission.
