

Quinlan Visual Arts Center

514 Green Street, N.E., Gainesville, GA 30501

PROJECT OVERVIEW

Curbing escalating energy costs has virtually every industry looking to adopt energy-saving practices, and the nonprofit sector is no exception.

At the Quinlan Visual Arts Center in Gainesville, Georgia, new LED indoor lighting has reduced the environmental impact from energy production and has saved on the bottom line. Made possible by the GoodUse partnership and with product support from GE Lighting, Quinlan will pay about \$5,000 less a year to illuminate its building, investing these finances instead in new events and exhibitions.
